

Veer Sanyal

Samamish, WA · 360-643-9424 · vsanyal@purdue.edu · linkedin.com/in/veersanyal

Multidisciplinary visual designer with 4+ years across raster editing, vector illustration, brand identity, and layout (Adobe Creative Suite and open-source equivalents), plus hands-on experience integrating and evaluating generative-AI output. Self-directed, detail-oriented, and comfortable working independently on remote contract work.

Design Experience

Etsy Digital Products Shop

Independent Designer & Shop Owner

Remote

2023 – Present

- Designed and sold 50+ original digital products (printable and editable planners, habit and fitness trackers, travel checklists, intake and invoice forms) end-to-end as sole designer and operator.
- Built a cohesive visual system per product line — custom layouts, color palettes, and typography across raster and vector workflows — holding brand consistency across an entire product family.
- Produced full marketing media per listing (device mockups, thumbnails, multi-image galleries, a product demo video) and delivered both fillable-PDF and print-ready versions, balancing original design with usability and exacting print specifications.

Design Projects

Graphic Design Portfolio (raster + vector)

2021 – Present

Photoshop, Illustrator, Lightroom — workflows transfer directly to GIMP, Inkscape, and Krita

- Designed branding and full report layouts for two 10-page DECA business-plan competition papers — MYCOFIX (custom wordmark and molecular icon mark) and Green Torch Solutions (complete brand identity) — producing polished, competition-ready documents.
- Created original logos and brand-identity explorations for self-initiated concept ventures (BAGBABY, PAPER ELEPHANT) and built vector illustrations and sports graphics (Purdue Pete vs. Oregon Duck mascot vector); retouched professional headshots at 300 PPI using layer masking and background compositing.

StudyFlowForge — Independent Product Build

Feb. 2026 – Present

React, TypeScript, Gemini API

- Integrated and evaluated AI-generated content (Gemini API), reviewing model outputs for accuracy, relevance, and quality against written criteria before surfacing them to users — directly analogous to creating and rating data used to train AI.
- Designed and shipped 18 user-facing screens end-to-end — UX flows, a reusable component library, and visual and information architecture.

Additional Experience

Firmly — Product & Engineering Intern

Jun. 2025 – Aug. 2025

- Reviewed and validated product output against written guidelines across ~15 edge cases with close attention to detail; worked independently and asynchronously across time zones.

Education

Purdue University — Mitch Daniels School of Business

West Lafayette, IN

B.S. Integrated Business and Engineering (IBE), Expected May 2028

Aug. 2024 – Present

Leadership & Activities

Engineering Projects in Community Service (EPICS) — Communications Officer & Build Lead

Aug. 2025 –

Dec. 2025

- Led a 7-person team and presented design tradeoffs and visual updates to faculty, sponsors, and stakeholders across two formal design reviews.

Skills

Creative Tools: GIMP, Inkscape, Krita (transferred from 4+ years in Adobe Photoshop, Illustrator, Lightroom); raster editing, vector illustration, pixel and layout design

Design Craft: Brand identity, logo design, typography, print & layout design, photo retouching, mockup production, UI/UX design, original visual conceptualing

AI & Workflow: AI-output evaluation & QA against written guidelines, generative-content workflows, LLM/Gemini API integration; independent async remote work, Excel, PowerPoint, Git/GitHub
