Education

Purdue University, Mitch Daniels School of Business West Lafayette, IN
B.S. Integrated Business and Engineering (IBE), Expected May 2028 Aug. 2024 – Present

- Selective hybrid program combining a full business core with an engineering curriculum. Coursework: Statistics, Engineering Design & Project Execution, Financial Accounting, Microeconomics.

Projects

India MSME Digital-Trade Exposure Dashboard May 2026 – Present
Solo build; live for a policy-research user Static HTML/CSS, Plotly, Python

- Scoped, built, and shipped an interactive data dashboard end-to-end that ranks India's small-business (MSME) service sectors by exposure to digital-trade policy; live on the web for a real policy-researcher user and iterated over 8+ weeks against a public decision log.
- Built a transparent exposure index from public WTO and government data, every proxy labeled and linked to source, and surfaced the central modeled-assumption caveat directly in the interface instead of burying it.
- Computed every figure from source data rather than hardcoding (caught a published statistic off by $\sim 3x$); instrumented the live site with usage telemetry; built with AI-assisted development (Claude Code) and a versioned decision log.

StudyFlowForge: AI-Powered Study Planner Feb. 2026 – Apr. 2026
Sole developer React, TypeScript, Supabase (PostgreSQL), SQL, Gemini API

- Scoped and shipped 18 user-facing screens end-to-end as sole developer for fellow students with fragmented study workflows; integrated an LLM (Gemini API) to generate personalized study plans and built a multi-factor scoring model (spaced repetition, forgetting-curve decay) in TypeScript.

Experience

Firmly (Fintech / E-commerce Platform) Remote
Product & Engineering Intern Jun. 2025 – Aug. 2025

- Shipped a PayPal checkout failure-recovery flow end-to-end; defined requirements, partnered with senior engineers, and validated fixes across ~ 15 high-risk payment edge cases, replacing a dead-end error page with a guided recovery flow.
- Built a repeatable QA workflow (edge-case matrix + release checklist, 20+ cases) adopted as the team standard for verifying fixes; added server-side error logging (Node.js/Express) that improved incident triage.

Student Managed Investment Fund (SMIF) West Lafayette, IN
Equity Research Analyst Jan. 2025 – Present

- Researched a public company end-to-end and co-authored a 20-page report; distilled it into a 10-slide pitch and presented the thesis to a 30+ member investment committee, defending assumptions in live questioning.

Leadership & Community

Engineering Projects in Community Service (EPICS) West Lafayette, IN
Communications Officer & Build Lead Aug. 2025 – Dec. 2025

- Led a 7-person team building a working display prototype for a local museum client; coordinated weekly tasks, drove a manufacturability trade-off (18 vs. 22 prisms), and presented decisions in two formal reviews to faculty, sponsors, and non-technical museum stakeholders.

Skills

Languages & tools: Python, HTML/CSS, Git/GitHub

Built with (shipped projects, AI-assisted development): React, TypeScript, Node.js/Express, SQL/PostgreSQL, REST APIs, Gemini API, Plotly

AI & workflow: Claude / Claude Code, telemetry instrumentation, dashboards & data visualization, problem scoping, spec writing, QA/verification, presenting to non-technical audiences, Agile
