

Veer Sanyal

Sammamish, WA — 360-643-9424 — vsanyal@purdue.edu — [linkedin.com/in/veersanyal](https://www.linkedin.com/in/veersanyal)

EDUCATION

Purdue University — Mitch Daniels School of Business

West Lafayette, IN

B.S. Integrated Business and Engineering (IBE) Expected May 2028

Aug. 2024 – Present

- **Relevant Coursework:** Financial Accounting, Microeconomics, Statistics, Engineering Design & Project Execution, Managerial Accounting

EXPERIENCE

Student Managed Investment Fund (SMIF)

West Lafayette, IN

Equity Research Analyst

Jan. 2025 – Present

- Researched a public company end-to-end—competitive landscape, customer trends, revenue drivers, and key risks—and synthesized findings into a 20-page client-style report on U.S. Bancorp recommending Buy at a \$57.35 target (~11.5% implied upside).
- Built a 3-statement financial model in Excel (DCF, comps, sensitivity analysis) to quantify upside/downside scenarios; defended assumptions against committee questioning and incorporated feedback into final thesis.
- Translated complex analysis into a 10-slide proposal and presented to a 30+ member investment committee, structuring the narrative for a mixed-experience audience and answering live Q&A.

Firmly

Remote

Product and Engineering Intern

Jun. 2025 – Aug. 2025

- Diagnosed a recurring client pain point (PayPal checkout failures) by interviewing engineering and support, mapping ~15 edge-case scenarios, and proposing a guided recovery flow that replaced a generic error page.
- Coordinated execution across product, engineering, and support working fully remote across time zones; authored handoff documentation that aligned the team on expected behavior and reduced back-and-forth.
- Delivered a repeatable QA workflow (20+ test cases + release checklist) adopted as the team standard, demonstrating ability to leave a small organization with a process improvement that outlasted the engagement.

LEADERSHIP & ACTIVITIES

Engineering Projects in Community Service (EPICS)

West Lafayette, IN

Communications Officer & Build Lead

Aug. 2025 – Dec. 2025

- Led a 7-person cross-functional team building a museum billboard prototype for a community client; coordinated weekly task assignments, surfaced blockers, and kept the team on schedule across two formal review milestones.
- Researched design tradeoffs (18 vs. 22 prisms, fabrication tolerances) and presented a structured recommendation with supporting analysis to faculty, sponsors, and museum stakeholders in two formal design reviews.

PROJECTS

StudyFlowForge — Independent Product Build | *React, TypeScript, Supabase*

Feb. 2026 – Present

- Identified an unmet need among Purdue students (fragmented study workflows), scoped a solution, and shipped 18 user-facing screens—owning the full cycle from problem definition through user-facing delivery.
- Researched competing study tools and learning-science best practices (spaced repetition, exam readiness scoring) to inform feature prioritization; integrated AI-powered content generation that cut manual content prep from hours to minutes.

SKILLS

Microsoft Office: Excel (financial modeling, DCF, sensitivity analysis, pivot tables), PowerPoint (client-style decks, investment pitches), Word

Collaboration & Remote Work: Zoom, Slack, async cross-functional coordination across time zones, structured handoff documentation

Research & Analysis: Industry/competitor research, stakeholder interviews, secondary research synthesis, written client reports

Technical: SQL (PostgreSQL), Python, JavaScript/TypeScript, Supabase, Git/GitHub
