

Veer Sanyal

Sammamish, WA — 360-643-9424 — vsanyal@purdue.edu — [linkedin.com/in/veersanyal](https://www.linkedin.com/in/veersanyal)

Available Summer 2026 — Willing to relocate to Englewood Cliffs, NJ

EDUCATION

Purdue University — Mitch Daniels School of Business

West Lafayette, IN

B.S. Integrated Business and Engineering (IBE) Expected May 2028

Aug. 2024 – Present

- **Relevant Coursework:** Financial Accounting, Microeconomics, Statistics, Engineering Design

EXPERIENCE

Firmly

Remote

Product and Engineering Intern

Jun. 2025 – Aug. 2025

- Defined requirements and shipped a PayPal checkout failure-recovery flow, replacing a generic error page with a guided completion path that improved the customer experience during payment failures.
- Partnered cross-functionally with an intern and senior engineer to validate fixes across ~15 high-risk checkout edge cases (e.g., missing billing/shipping data); documented expected behavior to streamline handoffs.
- Built a repeatable QA workflow with 20+ test cases and a release checklist, adopted as the team's standard process for fix verification across releases.

Student Managed Investment Fund (SMIF)

West Lafayette, IN

Equity Research Analyst

Jan. 2025 – Present

- Analyze public equities in a ~\$400K AUM student-managed portfolio; research competitive dynamics, customer trends, and revenue drivers to inform investment decisions.
- Built a 3-statement financial model in Excel (DCF, sensitivity analysis, comps) for U.S. Bancorp; quantified profitability drivers in a 20-page report recommending Buy at a \$57.35 target (~11.5% implied upside).
- Synthesized segment-level findings into a 10-slide pitch and presented thesis to a 30+ member investment committee; refined revenue assumptions and risk framing from cross-functional feedback.

PROJECTS

StudyFlowForge — Study Optimization Platform | *React, TypeScript, Supabase, SQL*

Feb. 2026 – Present

- Led end-to-end product development of a data-driven study platform; defined requirements, prioritized features via iterative sprints, and shipped 18 user-facing screens across study, analytics, and onboarding flows.
- Designed a user-segmentation engine in Supabase that targets content delivery by behavioral cohort, identifying engagement opportunities from real-time performance data; built reporting dashboards tracking mastery, retention, and at-risk topics with actionable KPIs.
- Developed process efficiencies by automating question generation via AI integration (Gemini API), reducing manual content creation from hours to minutes.

LEADERSHIP & ACTIVITIES

Engineering Projects in Community Service (EPICS)

West Lafayette, IN

Communications Officer & Build Lead

Aug. 2025 – Dec. 2025

- Led fabrication and assembly on a 7-person cross-functional team developing a rotating museum billboard prototype; managed daily/weekly task coordination and ran engineering checks that informed manufacturability decisions.
- Presented tradeoff analysis in two formal design reviews to faculty, sponsors, and museum stakeholders; communicated risks, constraints, and recommended next steps.

SKILLS

Analytics & Reporting: Microsoft Office Suite, financial modeling, DCF, sensitivity analysis, pivot tables

Languages & Data: Python, SQL, JavaScript/TypeScript

Product & Tools: Git/GitHub, Node.js, Express, Supabase (Postgres), Agile/Scrum methodology
