

Veer Sanyal

Sammamish, WA — 360-643-9424 — vsanyal@purdue.edu — [linkedin.com/in/veersanyal](https://www.linkedin.com/in/veersanyal)

Available Summer 2026 — Willing to relocate to Englewood Cliffs, NJ

EDUCATION

Purdue University — Mitch Daniels School of Business

West Lafayette, IN

B.S. Integrated Business and Engineering (IBE) Expected May 2028

Aug. 2024 – Present

- **Relevant Coursework:** Financial Accounting, Microeconomics, Statistics

SKILLS

Finance/Analytics: Excel (financial modeling, DCF, sensitivity analysis, comps, pivot tables), PowerPoint (investment pitches, reporting)

Languages & Data: Python, SQL, JavaScript/TypeScript

Platforms & Tools: Node.js, Express, Supabase (Postgres), Git/GitHub

EXPERIENCE

Student Managed Investment Fund (SMIF)

West Lafayette, IN

Equity Research Analyst

Jan. 2025 – Present

- Analyze public equities in a ~\$400K AUM student-managed portfolio; conduct market research on competitive dynamics, customer trends, and revenue drivers to inform investment decisions.
- Built a 3-statement financial model in Excel (DCF, sensitivity analysis, comps, EVA) for U.S. Bancorp; quantified profitability drivers across upside/downside scenarios in a 20-page report recommending Buy at a \$57.35 target (~11.5% implied upside).
- Synthesized segment-level attach-rate dynamics and competitive positioning into a 10-slide pitch; presented and defended thesis to a 30+ member committee, refining revenue assumptions from cross-functional feedback.

Firmly

Remote

Product and Engineering Intern

Jun. 2025 – Aug. 2025

- Shipped a PayPal checkout failure-recovery flow on an e-commerce platform, replacing a generic error page with a guided completion path that restored clear next steps for customers hitting payment failures.
- Implemented server-side error logging (Node.js/Express) capturing request context across ~15 edge-case states; enabled data-driven incident triage that eliminated previous reliance on ad-hoc reproduction attempts.
- Partnered cross-functionally with an intern and senior engineer to validate fixes across high-risk checkout scenarios (e.g., missing billing/shipping data); documented expected behavior to streamline engineering/support handoffs.
- Built a repeatable QA workflow with 20+ test cases and a release checklist to improve fix verification across releases, adopted as the team's standard process.

PROJECTS

StudyFlowForge — Study Optimization Platform | *React, TypeScript, Supabase*

Feb. 2026 – Present

- Designed a recommendation engine (414-line PL/pgSQL algorithm) for Purdue engineering students that segments users into behavioral cohorts and dynamically optimizes daily resource allocation using spaced repetition and a composite 5-factor prioritization model.
- Built a KPI dashboard tracking mastery, retention decay, coverage %, and at-risk topic identification across concurrent courses; developed a 14-day demand forecast projecting review volume from current performance data.

LEADERSHIP & ACTIVITIES

Engineering Projects in Community Service (EPICS)

West Lafayette, IN

Communications Officer & Build Lead

Aug. 2025 – Dec. 2025

- Led fabrication and assembly as build lead on a 7-person team developing a rotating museum billboard prototype; ran engineering checks (dimensions, tolerances) that informed key manufacturability decisions.
- Presented tradeoff analysis and progress in two formal design reviews to faculty, sponsors, and museum stakeholders; communicated risks, constraints, and recommended next steps.
