

# Veer Sanyal

Sammamish, WA (Seattle area) — 360-643-9424 — [vsanyal@purdue.edu](mailto:vsanyal@purdue.edu) — [linkedin.com/in/veersanyal](https://www.linkedin.com/in/veersanyal)

**Availability:** May 18, 2026 – Aug 7, 2026 (12 weeks)

## EDUCATION

**Purdue University — Mitch Daniels School of Business**

West Lafayette, IN

*B.S. Integrated Business and Engineering (IBE) Expected May 2028*

*Aug. 2024 – Present*

## EXPERIENCE

**Firmly**

Remote

*Product and Engineering Intern*

*Jun. 2025 – Aug. 2025*

- Shipped a PayPal checkout failure-recovery flow (completion/thank-you) replacing a generic error page; improved next-step clarity during payment failures.
- Instrumented server-side observability in Node.js/Express by logging request context and edge-case state (e.g., missing billing/shipping objects) to speed debugging and incident triage.
- Created a high-risk edge-case QA matrix and partnered with an intern + senior engineer to validate behavior across scenarios; documented expected outcomes to streamline support handoffs.
- Standardized release readiness with a repeatable QA workflow (test cases + checklist) to reduce “can’t reproduce” loops and improve fix verification across releases.

## PROJECTS

**Study Flow Forge (AI Study Planner) | React, TypeScript, Supabase (Postgres)**

Feb. 2026 – Present

- Building a Purdue-specific adaptive learning app that ingests course calendars to extract exam dates, topic sequence, and lecture schedule, then aligns practice recommendations to the real course timeline.
- Engineered an exam-aware prioritization engine scoring questions with four signals (due urgency, knowledge gap, difficulty match, novelty) and dynamically shifting from “stretch” to “bridge” questions when a student falls behind to prevent overwhelm near exams.
- Combined FSRS spaced repetition with per-topic mastery tracking, and built a multimodal AI question-generation pipeline (Gemini Vision) to extract formulas/worked examples from exams/slides and auto-generate MCQs; added guardrails to lock topics until their scheduled course week.

## LEADERSHIP & ACTIVITIES

**Student Managed Investment Fund (SMIF)**

West Lafayette, IN

*Analyst*

*Jan. 2025 – Present*

- Support a real-money equity portfolio (~\$400K AUM) by analyzing company fundamentals, drivers, and risks; contribute to investment decisions.
- Co-authored a 20-page report on U.S. Bancorp (NYSE: USB) recommending Overweight/Buy with a \$57.35 price target (~11.5% implied upside at the time); owned competition, risks, EVA, and portfolio strategy.
- Presented and defended updates in weekly meetings; refined assumptions and risk framing based on peer feedback and new data.

**Engineering Projects in Community Service (EPICS)**

West Lafayette, IN

*Communications Officer*

*Aug. 2025 – Dec. 2025*

- Build lead for a rotating museum billboard prototype on a 7-person team; owned fabrication, assembly, troubleshooting, and build execution.
- Ran engineering checks (dimensions, cut angles, tolerances) to inform manufacturability decisions (18 vs. 22 prisms) and alignment.
- Presented in two formal design reviews to faculty, sponsors, and museum stakeholders; communicated tradeoffs, risks, and next steps.

## SKILLS

**Languages:** TypeScript/JavaScript, Python, SQL (Postgres)

**Frameworks:** React, Node.js, Express

**Data/Backend:** Supabase (Postgres, RPC, Edge Functions)

**Tools/Analytics:** Git/GitHub, Vercel, logging/monitoring, Excel, PowerPoint
