

Veer Sanyal

Sammamish, WA — 360-643-9424 — vsanyal@purdue.edu — [linkedin.com/in/veersanyal](https://www.linkedin.com/in/veersanyal)

EDUCATION

Purdue University, Mitch Daniels School of Business

West Lafayette, IN

B.S. Integrated Business and Engineering (IBE) Expected May 2028

Aug. 2024 – Present

- **Relevant Coursework:** Financial Accounting, Microeconomics, Statistics, Engineering Design

EXPERIENCE

Firmly (Fintech / E-commerce Platform)

Remote

Product and Engineering Intern

Jun. 2025 – Aug. 2025

- Shipped a PayPal checkout failure-recovery flow end-to-end; defined requirements, partnered with senior engineers on implementation, and validated fixes across ~15 high-risk payment edge cases.
- Implemented server-side error logging (Node.js/Express) to capture request context and exception states, improving incident triage and observability for the engineering team.
- Built a repeatable QA workflow (20+ test cases plus a release checklist) adopted as the team standard for fix verification across releases; reduced cross-functional back-and-forth on handoffs.

Student Managed Investment Fund (SMIF)

West Lafayette, IN

Equity Research Analyst

Jan. 2025 – Present

- Analyze public equities in a ~\$400K AUM student-managed portfolio; built a 3-statement model in Excel (DCF, comps, sensitivity analysis) for U.S. Bancorp and authored a 20-page report recommending Buy at a \$57.35 target (~11.5% implied upside).
- Distilled segment-level analysis into a 10-slide pitch and presented thesis to a 30+ member investment committee; refined revenue assumptions and risk framing from cross-functional feedback.

PROJECTS

StudyFlowForge: Full-Stack Analytics Platform | *React, TypeScript, Supabase, SQL*

Feb. 2026 – Present

- Designed and shipped 18 user-facing screens (study, analytics, onboarding) end-to-end as sole developer; defined UX flows, component library, and information architecture to translate algorithmic outputs into an intuitive client-facing interface.
- Built operational dashboards in React + TypeScript surfacing mastery, retention, and at-risk metrics on top of a Supabase (PostgreSQL) backend; designed SQL schemas and queries powering real-time, drillable visualizations.
- Integrated AI-powered content generation (Gemini API) into the data pipeline, reducing manual content creation from hours to minutes; authored product documentation (specs, SOPs) to keep development aligned to roadmap.
- Engineered a multi-factor scoring model (spaced repetition, forgetting-curve decay, exam-readiness weighting) implemented in TypeScript with parameterized inputs; enabled scenario analysis on study schedules and surfaced outputs through interactive visualizations.

LEADERSHIP & ACTIVITIES

Engineering Projects in Community Service (EPICS)

West Lafayette, IN

Communications Officer & Build Lead

Aug. 2025 – Dec. 2025

- Led a 7-person cross-functional team building a museum billboard prototype; coordinated weekly tasks, presented design tradeoffs in two formal reviews to faculty, sponsors, and museum stakeholders.

SKILLS

Full-Stack & Product: React, TypeScript, JavaScript, Node.js, Express, REST APIs, UI/UX design, component architecture, product spec writing

Data & Backend: SQL, PostgreSQL (Supabase), Python, schema design, KPI dashboarding, data visualization

Quantitative & Analytics: Financial modeling, DCF, sensitivity analysis, scenario analysis, A/B testing fundamentals

Tools & Workflow: Git/GitHub, Gemini API, Claude Code (AI-assisted development), Agile sprints, technical documentation
