Education

Purdue University — Mitch Daniels School of Business

West Lafayette, IN

B.S. Integrated Business and Engineering (IBE), Expected May 2028

Aug. 2024 – Present

- Relevant coursework: Statistics, Microeconomics, Managerial Accounting, Financial Accounting, Engineering Design & Project Execution. IBE is a selective hybrid business + engineering program.

Experience

Firmly (fintech / e-commerce platform)

Remote

Product & Engineering Intern

Jun. 2025 – Aug. 2025

- Shipped a checkout failure-recovery flow end-to-end for an e-commerce payments platform; defined requirements and partnered cross-functionally with engineering, UX, and support to resolve ~15 high-risk payment edge cases.
- Built a repeatable QA workflow (edge-case tracker + release checklist, 20+ cases) adopted as the team standard for fix verification; created structured handoff documentation that reduced cross-team back-and-forth.
- Built and tracked product metrics (error rate, recovery rate) via server-side logging, turning raw usage data into actionable insights for prioritization.

Student Managed Investment Fund (SMIF)

West Lafayette, IN

Equity Research Analyst

Jan. 2025 – Present

- Researched a public company end-to-end (competitive landscape, consumer trends, pricing, revenue drivers, risks) and synthesized findings into a 20-page client-style report with a clear, data-backed recommendation supporting investment-committee decisions.
- Presented the thesis to a 30+ member committee and defended assumptions under live questioning; refined framing from stakeholder feedback. Built the supporting 3-statement model in Excel.

Projects

India MSME Digital-Trade Exposure Dashboard

Independent product build; live for a policy-research user

May 2026 – Present

- Built and shipped a live tool ranking which of India's small-business sellers (MSMEs) are most exposed to digital-commerce policy, so a decision-maker grounds the call in data; scoped and iterated end-to-end over 8+ weeks against a public decision log.
- Constructed a transparent exposure index from public WTO and government data using both qualitative and quantitative research, every proxy labeled and source-linked; surfaced the key modeled-assumption caveat directly in the interface.
- Instrumented the live site with usage telemetry and built interactive performance trackers; computed every figure from source data, catching a published statistic off by ~3x.

Leadership & Activities

Engineering Projects in Community Service (EPICS)

West Lafayette, IN

Communications Officer & Build Lead

Aug. 2025 – Dec. 2025

- Led a 7-person cross-functional team; coordinated weekly tasks, surfaced blockers, and presented tradeoffs in two formal reviews to faculty, sponsors, and museum stakeholders.

Skills

Research & Analysis: market & competitive research, qualitative and quantitative research, survey / interview synthesis, actionable-insight reporting, financial modeling (Excel, DCF)

E-commerce & Product: digital-commerce / marketplace domain, product scoping, KPI dashboards & trackers, usage telemetry, A/B testing fundamentals

Communication: stakeholder presentations, written client reports, cross-functional coordination, async remote collaboration

Tools: Excel, PowerPoint, Python, Plotly, SQL (built-with), Git/GitHub, Claude Code
