Education

Purdue University — Mitch Daniels School of Business

West Lafayette, IN

B.S. Integrated Business and Engineering (IBE), Expected May 2028

Aug. 2024 – Present

- Integrated Business and Engineering: a selective business + engineering hybrid degree. Relevant coursework: Statistics, Engineering Design & Project Execution, Managerial Accounting.

Experience

Firmly

Remote

Product and Engineering Intern

Jun. 2025 – Aug. 2025

- Shipped a PayPal checkout failure-recovery flow end-to-end: interviewed engineering and support to define requirements, then partnered with senior engineers and UX to launch a guided recovery experience replacing a generic error page.
- Validated fixes across ~15 high-risk payment edge cases; built and tracked product metrics (error rate, recovery rate) via server-side logging to drive data-driven decisions.
- Built a repeatable QA workflow (edge-case matrix + release checklist, 20+ test cases) adopted as the team standard; authored structured handoff documentation that reduced cross-functional back-and-forth.

Purdue Daniels Summer Externship — Scouting America (Sagamore Council)

Remote

Project Manager, 4-person consulting team

Jul. 2026 – Present

- Ran client discovery with the client's COO for a ~\$1.6M nonprofit (14-county territory); scoped and set the delivery timeline for a communications/marketing plan.
- Translated a 12-month event calendar into a 156-row, dated posting plan across 4 content types and 5 audiences; delivered it to the client, who called it "*an amazing start... unbelievable work.*"
- Audited the client's website and social presence with screenshots and named sources; quantified content-performance gaps (best-performing post style outscored the worst by roughly 25x) into prioritized, data-backed recommendations.

Projects

STICK — AI-Powered Study Platform

Independent product build, sole developer (React, TypeScript, Supabase)

2026 – Present

- Defined the product strategy for an exam-prep app – bounded, admin-curated AI over an open chatbot – and scoped a single-course Purdue pilot as the first real-user test.
- Designed and shipped an LLM extraction pipeline that ingested a real 14-page, 12-question exam end-to-end with 100% extraction confidence; all 12 auto-proposed answer keys matched the instructor's published key on first pass.
- Built the full student-facing practice loop end-to-end – auth, an FRSR-scheduled daily plan, and a server-graded question player – verified working via an automated end-to-end test.

Leadership & Activities

Engineering Projects in Community Service (EPICS)

West Lafayette, IN

Communications Officer & Build Lead

Aug. 2025 – Dec. 2025

- Led a 7-person cross-functional team building a rotating museum billboard prototype; translated requirements into build specs and presented design tradeoffs in two formal reviews to faculty, sponsors, and museum stakeholders.

Skills

Product & Strategy: product strategy & roadmaps, market & customer research, requirement definition, product documentation, GTM activities, cross-functional coordination (eng / design)

Data & AI: product performance analysis, SQL data modeling, LLM / generative-AI integration (Gemini API), Claude Code (AI-assisted development)

Tools: Python, HTML/CSS, Git/GitHub; Microsoft Office (PowerPoint, Excel, Word, Teams)
