

# Veer Sanyal

Sammanish, WA · 360-643-9424 · vsanyal@purdue.edu · linkedin.com/in/veersanyal

## Education

### Purdue University — Mitch Daniels School of Business

West Lafayette, IN

*B.S. Integrated Business and Engineering (IBE), Expected May 2028*

*Aug. 2024 – Present*

- Relevant Coursework: Financial Accounting, Managerial Accounting, Microeconomics, Statistics, Engineering Design & Project Execution

## Experience

### Student Managed Investment Fund (SMIF)

West Lafayette, IN

*Equity Research Analyst*

*Jan. 2025 – Present*

- Conducted financial analysis on a public company (U.S. Bancorp) within a ~\$400K AUM real-money portfolio; interpreted financial statements to identify revenue drivers, competitive dynamics, and key risks.
- Built a 3-statement financial model in Excel (DCF, comps, sensitivity analysis) to quantify profitability across upside and downside scenarios; defended assumptions with analytical rigor under committee questioning.
- Co-authored a 20-page client-style equity report recommending Buy at a \$57.35 target (~11.5% implied upside); led the competitive analysis and risk-assessment sections with close attention to detail.
- Distilled segment-level analysis into a 10-slide pitch for a 30+ member investment committee, communicating quantitative reasoning and financial terminology clearly to a mixed-experience audience.

### Firmly (Fintech / E-Commerce Platform)

Remote

*Product and Engineering Intern*

*Jun. 2025 – Aug. 2025*

- Reviewed and validated software output against written requirements across ~15 high-risk edge cases, applying structured judgment to flag inaccuracies before release.
- Built a repeatable QA workflow (20+ test cases plus a release checklist) adopted as the team standard for evaluating output accuracy and consistency across releases.
- Worked independently and asynchronously across time zones, following written guidelines and authoring handoff documentation that reduced ambiguity and back-and-forth.

## Projects

### StudyFlowForge — Independent Product Build

*Feb. 2026 – Present*

*React, TypeScript, Supabase (PostgreSQL), Gemini API*

- Integrated and evaluated AI-generated content (Gemini API), reviewing model outputs for accuracy and relevance before surfacing them to users — directly analogous to AI-response evaluation work.
- Engineered a multi-factor scoring model (weighted, parameterized inputs with scenario analysis) in TypeScript, mirroring factor-weighting logic used in financial models.

## Leadership & Activities

### Engineering Projects in Community Service (EPICS)

West Lafayette, IN

*Communications Officer & Build Lead*

*Aug. 2025 – Dec. 2025*

- Led a 7-person cross-functional team and presented structured tradeoff analyses with supporting data to faculty, sponsors, and stakeholders across two formal design reviews.

## Skills

**Financial Analysis & Modeling:** 3-statement modeling, DCF, comps, sensitivity & scenario analysis, financial statement interpretation, valuation, Excel (pivot tables)

**Research & Communication:** Equity research, client-style written reports, investment pitches, competitive analysis, quantitative reasoning, attention to detail

**AI & Quantitative:** AI-output evaluation & QA, LLM/Gemini API integration, multi-factor scoring models, SQL, Python

**Tools & Workflow:** PowerPoint, Word, Git/GitHub, independent async remote work, structured handoff documentation
