

Veer Sanyal

Sammamish, WA — 360-643-9424 — vsanyal@purdue.edu — [linkedin.com/in/veersanyal](https://www.linkedin.com/in/veersanyal)

EDUCATION

Purdue University, Mitch Daniels School of Business

West Lafayette, IN

B.S. Integrated Business and Engineering (IBE) Expected May 2028

Aug. 2024 – Present

- **Relevant Coursework:** Financial Accounting, Managerial Accounting, Microeconomics, Statistics, Engineering Design

EXPERIENCE

Firmly

Remote

Product and Engineering Intern

Jun. 2025 – Aug. 2025

- Shipped a PayPal checkout failure-recovery flow by clarifying requirements, aligning expected outcomes across engineering/product/support, and validating ~15 high-risk edge cases (e.g., missing billing/shipping data).
- Built a repeatable QA workflow (edge-case matrix + release checklist) that reduced “cannot reproduce” loops and was adopted as the team standard for fix verification across releases.
- Communicated status, risks, and escalation paths in structured handoff notes to streamline cross-functional coordination and reduce back-and-forth between teams.
- Implemented server-side error logging (Node.js/Express) to capture request context and exception states, improving incident triage and root-cause investigation.

Student Managed Investment Fund (SMIF)

West Lafayette, IN

Equity Research Analyst

Jan. 2025 – Present

- Analyze public equities in a ~\$400K AUM student-managed portfolio; research competitive dynamics, revenue drivers, and risk factors to inform investment decisions.
- Built a 3-statement financial model in Excel (DCF, sensitivity analysis, comps) for U.S. Bancorp; quantified profitability drivers across upside/downside scenarios in a 20-page report recommending Buy at a \$57.35 target (~11.5% implied upside).
- Synthesized segment-level findings into a 10-slide pitch deck and presented thesis to a 30+ member investment committee; refined assumptions and risk framing from cross-functional feedback.

PROJECTS

StudyFlowForge: Data-Driven Study Platform | *React, TypeScript, Supabase, SQL*

Feb. 2026 – Present

- Led end-to-end product development of a study optimization platform; defined functional requirements, prioritized features via iterative sprints, and shipped 18 user-facing screens across study, analytics, and onboarding flows.
- Designed a recommendation engine and operational dashboards tracking mastery, retention, and at-risk topics with actionable KPIs; dynamically adjusts content delivery based on real-time performance data.
- Automated question generation through AI integration (Gemini API), reducing manual content creation from hours to minutes and improving daily content operations throughput.

LEADERSHIP & ACTIVITIES

Engineering Projects in Community Service (EPICS)

West Lafayette, IN

Communications Officer & Build Lead

Aug. 2025 – Dec. 2025

- Led fabrication and assembly on a 7-person cross-functional team developing a rotating museum billboard prototype; managed daily/weekly task coordination and hit review milestones on schedule.
- Ran engineering checks (dimensions, tolerances, cut angles) that informed manufacturability decisions and presented tradeoff analysis in two formal design reviews to faculty, sponsors, and museum stakeholders.

SKILLS

Analytics & Reporting: Excel (financial modeling, DCF, sensitivity analysis, pivot tables), PowerPoint (investment pitches, stakeholder reporting)

Languages & Data: Python, SQL (PostgreSQL), JavaScript/TypeScript

Tools & Methods: Git/GitHub, Node.js, Express, Supabase (Postgres), process documentation, QA workflows, cross-functional coordination
