

Veer Sanyal

Sammamish, WA — 360-643-9424 — vsanyal@purdue.edu — [linkedin.com/in/veersanyal](https://www.linkedin.com/in/veersanyal)
Available May–Aug 2026 (12+ weeks, full-time, on-site) — Willing to relocate to Palo Alto, CA

EDUCATION

Purdue University — Mitch Daniels School of Business West Lafayette, IN
B.S. Integrated Business and Engineering (IBE) Expected May 2028 Aug. 2024 – Present
• **Relevant Coursework:** Engineering Design & Project Execution, Statistics, Managerial Accounting, Microeconomics

EXPERIENCE

Engineering Projects in Community Service (EPICS) West Lafayette, IN
Build Lead & Communications Officer — Rotating Museum Billboard Prototype Aug. 2025 – Dec. 2025

- Owned execution for a 7-person cross-functional hardware team building an electromechanical rotating-prism billboard prototype; managed build schedule, weekly task assignments, and tracked deliverables against two formal design-review milestones.
- Drove a key DFM tradeoff study (18 vs. 22 prism configuration) by running dimensional, cut-angle, and tolerance checks; quantified manufacturability and mass impact and communicated the recommendation to faculty, sponsors, and museum stakeholders.
- Fabricated and assembled mechanical components using drill press, chop saw, table saw, and belt sander; troubleshoot fit/finish and alignment issues on-the-fly to hold review milestones without schedule slip.
- Presented build status, risk register, and tradeoff analysis in two formal design reviews; authored handoff documentation clarifying open issues and next steps for the following semester's team.

Firmly Remote
Product and Engineering Intern Jun. 2025 – Aug. 2025

- Central point of contact for a checkout failure-recovery workstream; defined requirements, tracked execution across engineering and support, and drove resolution of blockers to ship on schedule.
- Created structured handoff documentation covering ~15 high-risk edge cases; aligned engineering, product, and support on expected behavior and reduced cross-functional back-and-forth during validation.
- Built a repeatable QA and release-verification workflow (20+ test cases + release checklist) adopted as the team's standard for fix verification, tightening test/validation cycles across releases.

PROJECTS

Study Flow Forge — Schedule & Priority Engine | *React, TypeScript, Supabase, SQL* Feb. 2026 – Present

- Architected an exam-aware prioritization engine that ranks work items by urgency, gap, difficulty, and novelty; generates an ordered execution plan that dynamically re-sequences as constraints and deadlines change.
- Built schedule-tracking views surfacing late/missed items and load near deadlines—applying the same risk-to-schedule logic used in hardware program tracking (cost, reliability, mass analogs).
- Maintained a structured database of topics, dates, and requirements; documented data model and update flows so future contributors can extend the system without regressions.

LEADERSHIP & ACTIVITIES

Student Managed Investment Fund (SMIF) West Lafayette, IN
Equity Research Analyst Jan. 2025 – Present

- Co-authored a 20-page report on U.S. Bancorp with 3-statement model and sensitivity analysis; defended assumptions and tradeoffs before a 30+ member investment committee.

SKILLS

Program Management: Schedule tracking, risk registers, DFM/tradeoff analysis, release checklists, cross-functional coordination, technical design reviews, stakeholder communication
Hardware / Fabrication: Drill press, chop saw, table saw, belt sander; dimensional & tolerance checks, mechanical assembly, prototype build-out
Tools: Microsoft Office (Excel, PowerPoint, Word), Git/GitHub, SQL (PostgreSQL), JIRA-style issue tracking (workflows, test matrices), Confluence-style documentation
Programming: Python, JavaScript/TypeScript, SQL; Node.js, Express
