Education

Purdue University — Mitch Daniels School of Business

West Lafayette, IN

B.S. Integrated Business and Engineering (IBE), Expected May 2028

Aug. 2024 – Present

- Integrated Business and Engineering: a selective business + engineering hybrid degree. Relevant coursework: Statistics, Engineering Design & Project Execution, Managerial Accounting, Microeconomics.

Experience

Firmly

Remote

Product and Engineering Intern

Jun. 2025 – Aug. 2025

- Shipped a PayPal checkout failure-recovery flow end-to-end: analyzed user needs, defined requirements, and partnered with senior engineers and UX to launch a guided recovery experience replacing a generic error page.
- Validated fixes across ~15 high-risk payment edge cases (missing billing/shipping data); built and tracked product metrics (error rate, recovery rate) via server-side logging to drive data-driven decisions.
- Built a repeatable QA workflow (edge-case matrix + release checklist, 20+ test cases) adopted as the team standard; authored structured handoff docs that reduced cross-functional back-and-forth.

Student Managed Investment Fund

West Lafayette, IN

Equity Research Analyst

Jan. 2025 – Present

- Analyzed market trends, competitive dynamics, and revenue drivers for U.S. Bancorp in a ~\$400K AUM real-money fund; synthesized research into a 20-page report recommending Buy at a \$57.35 target (~11.5% implied upside).
- Presented the thesis in a 10-slide deck to a 30+ member investment committee and defended assumptions under live questioning; refined revenue and risk framing from stakeholder feedback.

Projects

StudyFlowForge — AI-Powered Study Planner

Independent product build (React, TypeScript, Supabase, Gemini API)

Feb. 2026 – Present

- Defined product strategy and roadmap for an AI planner using LLM-based prioritization (Gemini API) to surface personalized, context-aware study plans from course-calendar data.
- Integrated generative AI (Gemini API) into the data pipeline and designed the SQL / PostgreSQL data architecture (Supabase) powering real-time, drillable dashboards on mastery, retention, and at-risk metrics.
- Shipped 18 user-facing screens end-to-end as sole developer; ran user research and translated pain points into an exam-aware prioritization engine and exception-handling views.

Leadership & Activities

Engineering Projects in Community Service (EPICS)

West Lafayette, IN

Communications Officer & Build Lead

Aug. 2025 – Dec. 2025

- Led a 7-person cross-functional team building a rotating museum billboard prototype; coordinated weekly tasks, translated requirements into build specs, and presented design tradeoffs in two formal reviews to faculty, sponsors, and museum stakeholders.

Skills

Product & Strategy: product strategy & roadmaps, PRDs / specs, market & competitive analysis, user research, success metrics, cross-functional (eng / UX)

AI & Data: LLM / Gemini API integration, generative-AI product integration, Claude Code (AI-assisted development), SQL schema & data architecture, KPI dashboarding, A/B testing fundamentals

Engineering & Tools: Python, HTML/CSS, Git/GitHub; React / TypeScript, Node.js / Express (built with); Excel, PowerPoint
